Compiled by Ann Kettenbeil

The following is a list of film and video productions shot in Canada in 1986. The categories are Canadian theatrical features, television features, one-hour television, and foreign theatrical features and television programs.

Although the list is as complete as we were able to make it, there are inevitable omissions and errors, for which we apologize in advance. In some cases, the production company could no longer be traced, in others the "nationality" of the film was uncertain. In still others, a pilot may have failed to materialize into a series though the title remains in our series list. We take this occasion to ask producers to provide us throughout the year with the most complete information possible.

The information is given in the following order:

- title
- production company
- producer
- director
- dates of principal photography
- location of shoot
- financial participants (see abbreviations below)
- miscellaneous information, including CRTC license (CRTC) and Canadian certification approval (CCA). The latter may just denote provisional approval.

In the listing of financial participants, the order of the various parties has no special significance; participation may pre-sales, etc. The following abbreviations have been used: FC = First Choice Communications, OFDC = Ontario Film Development Corp., PBS = a Public Broadcasting Station, RC = Société Radio-Canada, RQ = Radio Québec, SGCQ = Société générale de cinéma du Québec, SABC = South Africa Broadcasting Corp., SE = Super Écran, cases, the call numbers of various stations are used.

The publication of this 1986 Production Guide was made possible, in part, by the support of Telefilm Canada.
