

PRODUCTION GUIDE

by José Arroyo

The following is a list of films in production (actually before cameras) and in negotiation in Canada. Needless to say, the films which are still in the project stage are subject to changes. A third category, **In Pre-Production**, will be used to indicate films which are in active pre-production, having set a date for the beginning of principal photography and being engaged in casting and crewing. Films are listed by the name of the company which initiated the project, or with which the project is popularly associated. This is not necessarily the name of the production company, if known, is also given. In instances where a producer has asked us not to list a project, or to withhold certain credits due to ongoing negotiations, we have respected his/her request. The guide only lists productions or series whose duration will be one hour or over. Please telephone additions and up-dates information to: **Cinema Canada (416) 596-6829 or (514) 272-5354**

NEWS ...

New Low-Light Filter Gives Edge to Motion Picture Cinematographers

Tiffen has developed the LL-D™ Filter that allows cinematographers to use tungsten corrected film in low-light daylight situations WITHOUT exposure compensation.

Testing has shown that, for most situations, the LL-D handles much of the necessary filtration requirements normally produced by an 85 Series filter, without requiring exposure compensations.

Filming without a filter, and expecting the lab to compensate, runs the risk of minimizing available colour latitude, as well as resulting in overly yellowish greens and neutral tones. The LL-D has been shown to achieve results that with subsequent lab correction, not only expand the available colour latitude substantially, but also produce colour quality very close to that made with a standard 85 Series filter.

The Tiffen LL-D filter, almost clear in colour, is available in all professional sizes including round, square and rectangular. The product is now available from CINEQUIP INC. and pricing is in line with many Tiffen special effects filters.

Control Fluorescents

And HMI and tungsten and daylight
and virtually every other light source

Send for the New Cinegel
Filter Book. FREE.

Cinegel is Rosco's Academy Award
winning range of materials for light
control.

Now, it's a more exciting series than
ever. The range includes additions and
reformulations specifically developed to
meet the demands of the new film
emulsions and light sources.

Among the nearly 100
materials in the
new Cinegel

swatchbook, you'll find filters for
controlling fluorescents and the full range
of arcs, as well as tungsten lamps.
Included are 18 different diffusion
materials and eleven metallized surfaces
for reflectors. You'll also find that the
technical data you need is included right
in the swatchbook.

Be sure you have your own Rosco
Cinegel swatchbook. It's a basic tool of
the trade and it's available free from
your rental house, Authorized
Rosco Dealer, or any
Rosco office.

Eastman

There is no substitute.

Whether you're shooting a motion picture or a television commercial, one medium gives you the best look: film.

And the film look most producers choose is Eastman Professional.

The reasons why show up on any size screen. Rich, accurate color. Excellent grain. Wide exposure latitude. Sheer quality that's consistent, roll after roll.

The Eastman Professional look is the result of Kodak's commitment to developing the most modern motion picture film technology. It's yours in a wide range of formats, stocks and speeds. And Eastman Professional is conveniently available, wherever in Canada you choose to shoot.

Eastman Professional motion picture film. If you want the best look, there is no substitute.
